### **Reasons for allowance**

The following is an examiner's statement of reasons for allowance:

The prior art references submitted by the applicant on IDS form received on 1/19/05 was reviewed and considered. These references (e.g. Ref. No. 64002417 and U.S Patent No. 5,175,752) appear to be the best references with respect to the claimed invention (e.g. frequency divider). However, the method step "limiting the amplitude of the output signal using an amplitude adjusting section, wherein the limiting of the amplitude of the output signal reduces a time for the output signal to reach a steady state value" in combination with "receiving a divided clock signal.." and "producing an output signal in a clock buffer section ..." method steps as recited in claim 1; and the method step "dividing the first and second clock signals ... 180° out of phase with respect to each other" and "producing first and second divided clock input ... there is a reduction in time in a transition of the amplitude of the first and second divided clock output signals to a steady state value" in combination with "generating first and second clock signals" and "producing clock output signals..." method steps as recited in claim 11. Therefore, the claims are patentably distinct over all these prior art references of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
